

Batavi Implementation Guide

Batavi Implementation Guide

Batavi v 1.0.4 or above.

1. Backup the following files on your server:

<root> / includes / modules / boxes / boxcartCustomerData.php

<root> / templates / default / includes / account.tpl

<root> / libraries / utils / btv_Products_Factory.php

2. Upload the *includes, libraries, and templates* folders to your <root> directory.

3. Open <root> / includes / configure.php and insert the following:

```
define('PARTNER_KEY', 'YOUR_PARTNER_KEY');           // BONGO API KEY
define('BONGO_ACTION', 'YOUR_CHECKOUT_URL');         // BONGO CHECKOUT URL
```

4. Replace *YOUR_PARTNER_KEY* and *YOUR_CHECKOUT_URL* in the above code. Save *configure.php*
