

UberCart Implementation Guide

Before beginning, ensure the following modules are installed and active:

- Required module Token
 - Default image support CCK (Content)
 - FileField
 - ImageAPI (ImageAPI, ImageAPI GD2)
 - ImageCache
 - ImageField
 - Thickbox
 - Views
1. In your Ubercart module folder (usually located at <root>/modules/ubercart or <root>/sites/all/ubercart) **backup the uc_cart and uc_store folders.**
 2. **Edit the provided copy of uc_cart.pages.inc, on line 231 insert your PARTNER_KEY.**
 3. Upload **uc_cart.js** and **uc_cart.pages.inc** to the uc_cart folder.
 4. Upload **uc_store.module** to the uc_store folder. **(NOTE: If you get any errors after this step, try uploading this file in TEXT mode, NOT binary).**
