

oscMax Implementation Guide

Requirements

- oscMax v2.0+
- Your Partner Key and Checkout URL.

Instructions

1. Backup the following files on the server where your oscMax installation is setup:

```
<root>/catalog/  
  /checkout_shipping.php  
  /includes/configure.php  
  /includes/functions/general.php  
  /templates/fallback/content/checkout_shipping.tpl
```

2. Edit your `/catalog/includes/configure.php` file and insert the following code:

```
define('PARTNER_KEY', 'YOUR PARTNER KEY');  
define('BONGOUS_ACTION', 'YOUR CHECKOUT URL');
```

NOTE: Remember to replace YOUR PARTNER KEY and YOUR CHECKOUT URL with the applicable information.

3. Upload the catalog folder included to your **root** folder where you installed oscMax, this will merge the two and replace the files that were backed up in step 1.
