

Pinnacle Cart Implementation

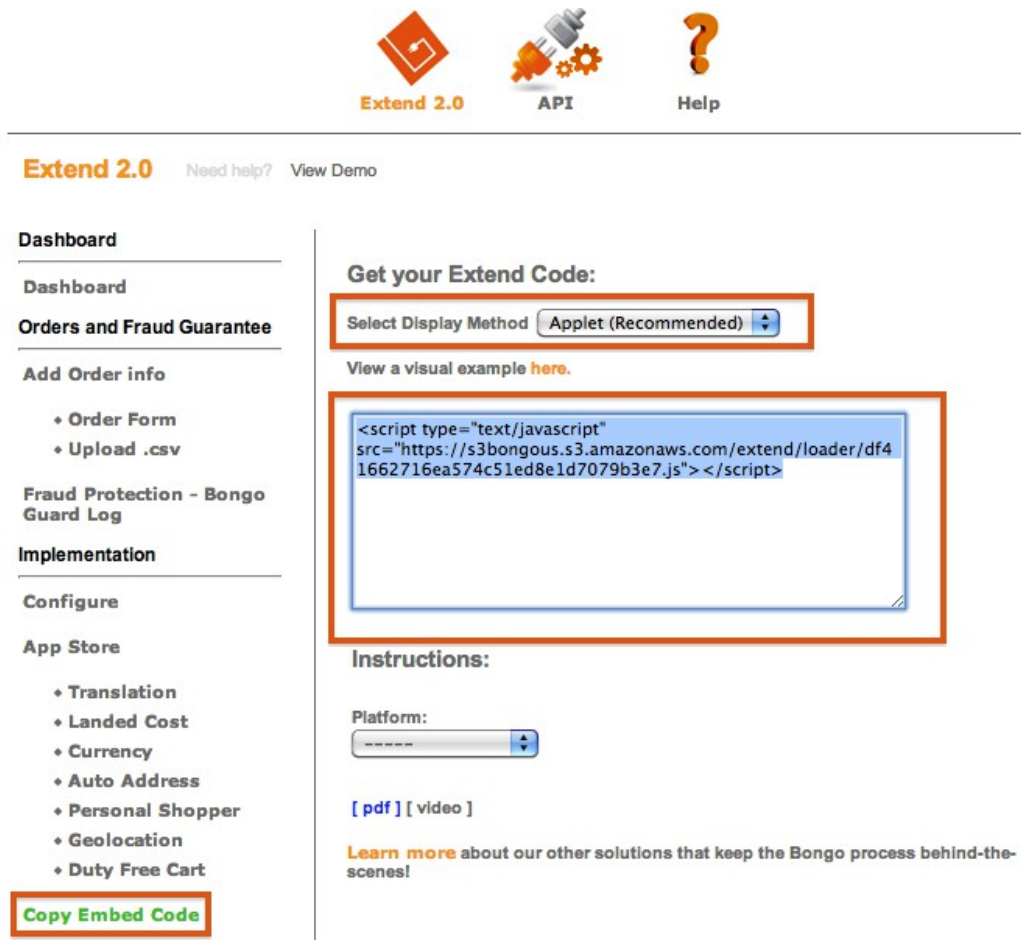

Implementing Extend on Pinnacle Cart

STEP 1: Finding the Bongo Extend Coding

If you haven't been provided the necessary coding for Bongo Extend, you can access it by logging into your partner account at bongous.com/partner.

Click the **Extend 2.0** link, navigate under **Implementation** on the left and click on **Copy Embed Code**.

Make sure the display method is set to **Applet**. Copy the coding in the box below.

The screenshot shows the Bongo Extend 2.0 partner dashboard. At the top, there are three icons: 'Extend 2.0' (a diamond with an arrow), 'API' (gears), and 'Help' (a question mark). Below the icons, the 'Extend 2.0' section is active, with links for 'Need help?' and 'View Demo'. The left sidebar contains a navigation menu with categories: 'Dashboard', 'Orders and Fraud Guarantee', 'Add Order info' (with sub-items 'Order Form' and 'Upload .csv'), 'Fraud Protection - Bongo Guard Log', 'Implementation', 'Configure', and 'App Store' (with sub-items 'Translation', 'Landed Cost', 'Currency', 'Auto Address', 'Personal Shopper', 'Geolocation', and 'Duty Free Cart'). A 'Copy Embed Code' button is highlighted in a red box at the bottom of the sidebar. The main content area is titled 'Get your Extend Code:' and features a 'Select Display Method' dropdown menu set to 'Applet (Recommended)'. Below this is a link to 'View a visual example here.' A large text box contains the following JavaScript code:

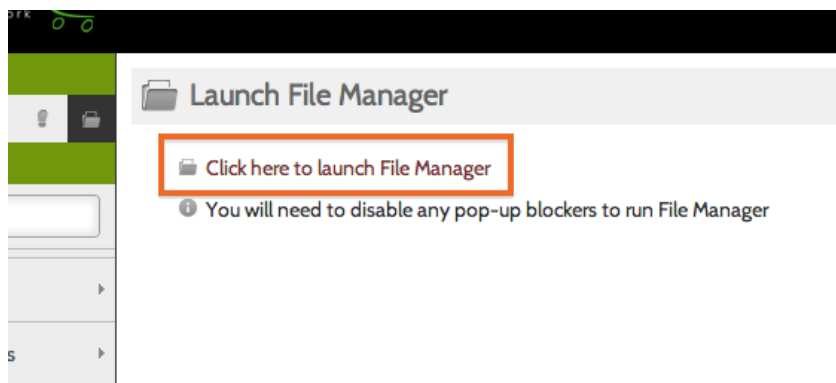

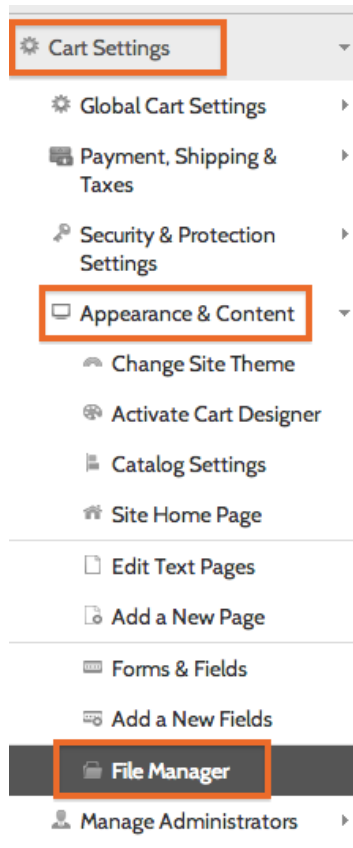

```
<script type="text/javascript" src="https://s3bongous.s3.amazonaws.com/extend/loader/df41662716ea574c51ed8e1d7079b3e7.js"></script>
```

 Below the code box, there are 'Instructions:' and a 'Platform:' dropdown menu. At the bottom, there are links for '[pdf]' and '[video]', and a link to 'Learn more about our other solutions that keep the Bongo process behind-the-scenes!'.

Implementing Extend on Pinnacle Cart

STEP 2: Adding the Extend coding

1. Log-in to your Pinnacle Cart account.
2. Navigate to **Cart Settings > Appearance & Content > File Manager**. Then, click the link to launch the file manager.

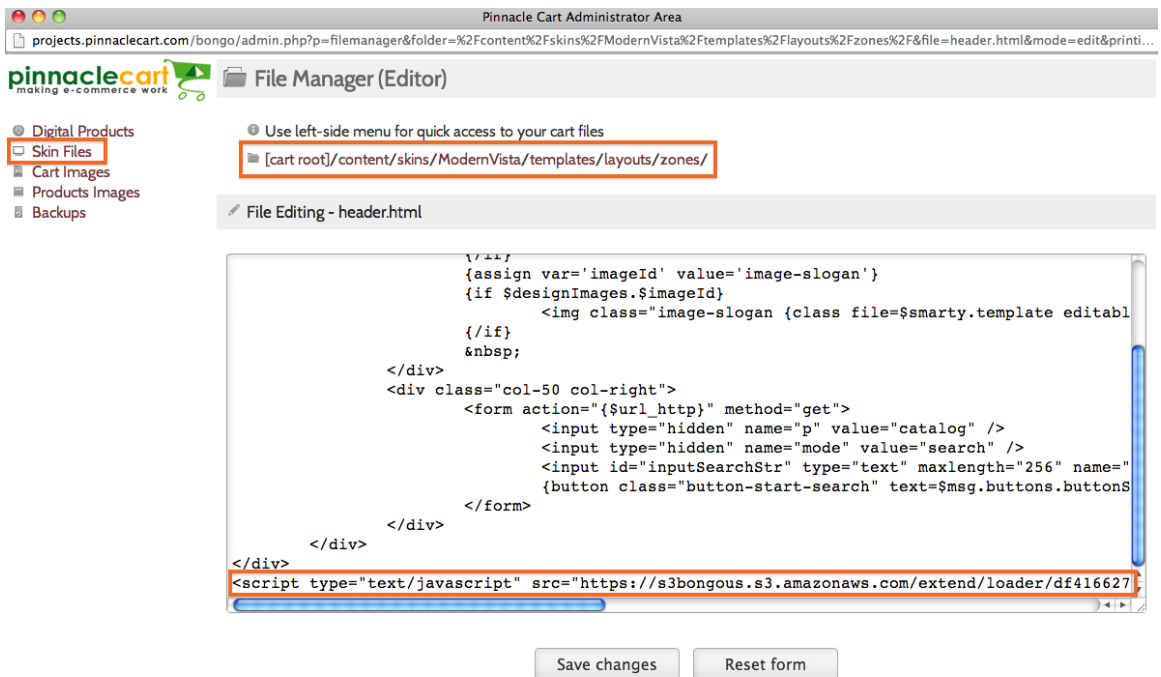

Implementing Extend on Pinnacle Cart

3. A new window will pop-up with the file manager. Follow the path **content > skins > [TEMPLATE NAME] > templates > layouts > zones** and edit the file called **header.html**.

*(NOTE: You can also click the **Skin Files** link on the left to take you directly to the skins folder.)*

4. Paste the Bongo Extend code after the last line of the file's existing coding. Then, click **Save Changes**. The Bongo Extend applet will now show up on each page of your site.

The screenshot shows the Pinnacle Cart Administrator Area File Manager. The left sidebar has a tree view with 'Skin Files' selected. The main area shows the file path '[cart root]/content/skins/ModernVista/templates/layouts/zones/' and the file 'header.html' being edited. The code in the editor includes a search form and a Bongo Extend script tag at the bottom: `<script type="text/javascript" src="https://s3bongous.s3.amazonaws.com/extend/loader/df416627"`. Below the editor are 'Save changes' and 'Reset form' buttons.
