

## X-Cart Implementation

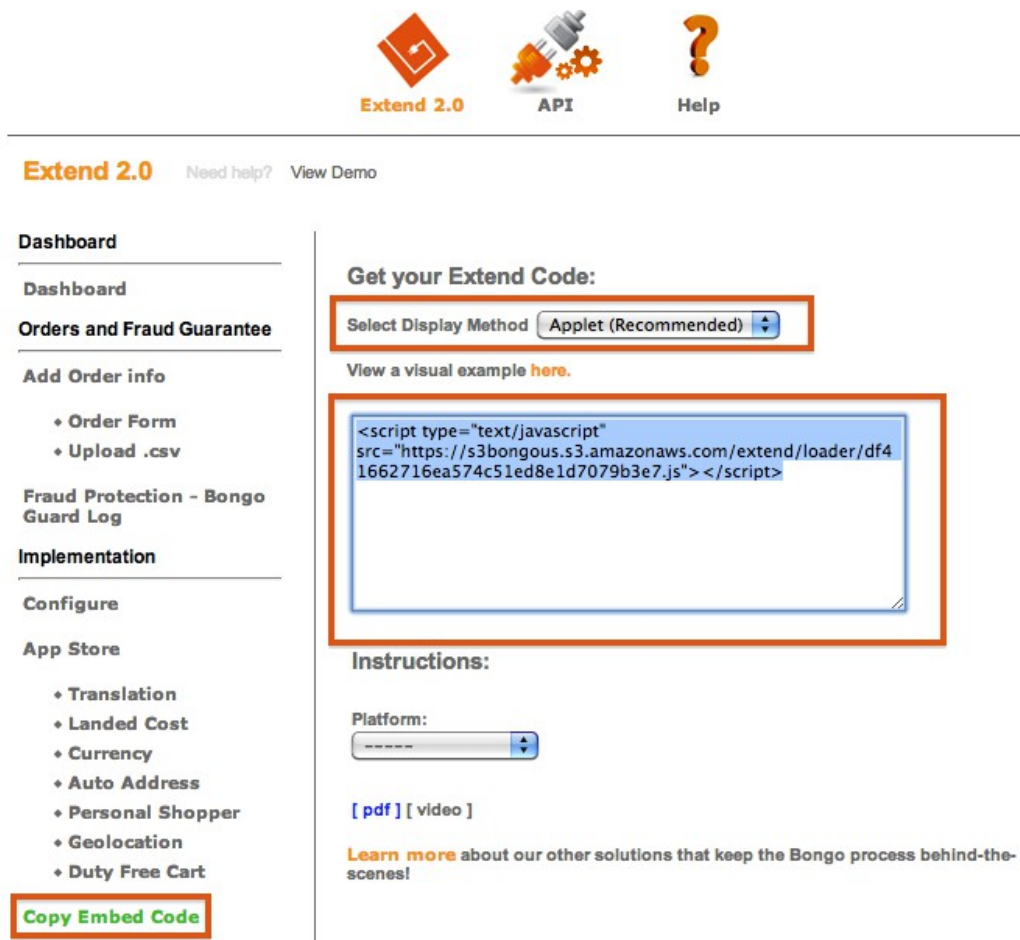

# Implementing Extend on X-Cart

## STEP 1: Finding the Bongo Extend Coding

If you haven't been provided the necessary coding for Bongo Extend, you can access it by logging into your partner account at [bongous.com/partner](https://bongous.com/partner).

Click the **Extend 2.0** link, navigate under **Implementation** on the left and click on **Copy Embed Code**.

Make sure the display method is set to **Applet**. Copy the coding in the box below.

The screenshot shows the Bongo Extend 2.0 partner dashboard. At the top, there are three icons: 'Extend 2.0' (a diamond with an arrow), 'API' (gears), and 'Help' (a question mark). Below the icons, the 'Extend 2.0' section is active, with links for 'Need help?' and 'View Demo'. The left sidebar contains a navigation menu with categories: 'Dashboard', 'Orders and Fraud Guarantee', 'Add Order info', 'Fraud Protection - Bongo Guard Log', 'Implementation', 'Configure', and 'App Store'. Under 'Implementation', the 'Copy Embed Code' button is highlighted with a red box. The main content area is titled 'Get your Extend Code:' and features a 'Select Display Method' dropdown menu set to 'Applet (Recommended)', also highlighted with a red box. Below this is a link to 'View a visual example here.' A large text box contains the following JavaScript code, highlighted with a red box: 

```
<script type="text/javascript" src="https://s3bongous.s3.amazonaws.com/extend/loader/df41662716ea574c51ed8e1d7079b3e7.js"></script>
```

 Underneath the code box, there are 'Instructions:' and a 'Platform:' dropdown menu. At the bottom of the instructions, there are links for '[ pdf ]' and '[ video ]', and a link to 'Learn more about our other solutions that keep the Bongo process behind-the-scenes!'.

---

## STEP 2: Adding the Extend coding

1. Open a FTP client and log-in to the server your X-Cart store is hosted on.
2. Navigate to **skin > [TEMPLATE NAME] > customer** and edit the **head.tpl** file.
3. Paste the Bongo Extend Launcher coding before the last **</div>** tag and save the file. Bongo Extend will now show up on each page, including the cart and checkout.

```
<a href="register.php">{$lng.lbl_register}</a>
else}
<span>{$fullnamedefault:$login|escape}</span>
<a href="{$_xcart_web_dir}/login.php?mode=logout">{$lng.lbl_logoff}</a>
|
<a href="register.php?mode=update">{$lng.lbl_my_account}</a>
{/if}
|
<a href="help.php" class="last">{$lng.lbl_need_help}</a>
</div>

{/if}

</div>

<div class="line2">

    {if ($main ne 'cart' or $cart_empty) and $main ne 'checkout'}
    {include file="customer/search.tpl"}
    {/if}
    {include file="customer/phones.tpl"}

</div>

<div class="line3">
    {include file="customer/tabs.tpl"}
</div>

<script type="text/javascript" src="https://s3bongous.s3.amazonaws.com/extend/loader/81c475385d09d26def2f919e2b90a2f3.js">
</div>
```
